ABOUT ME

I'm a passionate Full Stack Developer specializing in React.js for frontend development and Node.js for backend solutions. I have experience building responsive web applications, integrating RESTful APIs, and managing databases with MongoDB. I focus on writing clean, scalable code and delivering user-friendly interfaces backed by robust server-side logic. I'm comfortable working across the entire web development stack, from UI design to backend architecture, and I enjoy learning new technologies to improve performance and user experience.

EDUCATION

2020-2023 Bachelor of commerce
VNSGU University

2022-2023 Full-stack development
TechSchool multimedia instituse
Completed a hands-on training program focused on building full stack web applications using React.js for frontend and Node.js for backend. Gained practical experience with MongoDB, Express.js, REST APIs, and version control (Git). Developed multiple projects to strengthen understanding of real-world web application architecture.

EXPERIENCE

2023-2025 Full-Stack developer(freelancer)
Client based
Worked with multiple clients to design, develop, and deploy full-stack web applications using HTML, CSS, JavaScript, React.js, Node.js, Express.js, and MongoDB. Built responsive, user-friendly frontends with reusable UI components while developing secure and scalable backends with RESTful APIs. Optimized database queries, implemented authentication and authorization, and ensured cross-browser and cross-platform compatibility. Collaborated directly with clients to gather requirements, propose solutions, and deliver high-quality, end-to-end applications on time.

PROJECTS

PROJECT TITLE : E-COMMERCE WEBSITE

DESCRIPTION : Built a full-stack e-commerce web application with user and admin interfaces. The user side allows browsing products, managing cart, and placing orders. The admin panel enables product management, order tracking, and user control. Developed the frontend using React.js with responsive UI and component-based architecture. Backend built with Node.js and Express.js, featuring RESTful APIs and JWT-based authentication. Used MongoDB for efficient data storage and CRUD operations.

PROJECT TITLE : IMPORT-EXPORT COMPANY WEBSITE

DESCRIPTION : Developed the complete frontend for an import-export company website through a direct client engagement. Designed and implemented responsive pages including Home, About, Services, Contact, and a dynamic Products section to display categorized items with images and details. Focused on clean UI, mobile responsiveness, and smooth client communication to meet business needs and deliver on time.

PROJECT TITLE : REAL ESTATE LANDING PAGE

DESCRIPTION : Created a modern, responsive landing page for a real estate company. Focused on showcasing property listings, agent profiles, and contact forms. Designed with clean UI and optimized layout for mobile and desktop users.
